

Lean for Leadership

Program Participants:

This program is designed for the Senior Leadership team working in the manufacturing and service industries, who want to equip themselves with the knowledge and skills necessary to be effective Transformation & Change Leaders and Lean Practitioners in their organization.

Program Overview:

Lean Program which is often known simply as "Lean", is a generic process management philosophy derived mostly from the **Toyota Production System (TPS)**. It is a powerful method that allows organizations to improve the productivity, efficiency, quality & time to market for their products and/or services. Companies today, from a wide range of industries, government agencies and other areas are finding ways to apply the principles of lean as a means of producing goods and delivering services that creates value for the customer with the minimum amount of waste and the highest level of quality. Our simulation-based, hands-on workshop will present you with essential principles, tools and applications of Lean in any environment - Manufacturing and Transactional. Upon the completion of this program, the participants will be able to:

- Understand the Lean Philosophy, Principles and Tools.
- Understand the business significance of Lean.
- Design the Lean Transformation Strategy and Deployment Program.
- Conduct Value Stream Maps of the Current State, identify waste & opportunities and Develop a Future State VSM.
- Guide & mentor internal programs & projects around LEAN.
- Understand why LEAN is a pre-requisite for digitalization to make it fast & cost efficient.

Program Duration : 1 day or 2 days.

Training Contents :

- ✚ Lean Overview and Business results improvement through Lean
- ✚ Lean Simulation - I
- ✚ Discussion on Lean Simulation and plan improved process
